This is your free index to this year's journal. It has been designed as a four-page pull-out supplement; please remove carefully from the staples and file with your 1984 issues.

INDEX TO PRODUCTION ENGINEER Vol 63 1984

Journal of the Institution of Production Engineers

Please remove index and retain with your 1984 issues

INDEX TO PRODUCTION ENGINEER Vol 63 1984

Subject index

$10 million FMS at Vought to build fuselage components **Jan p39**
£50 000 order from BS **Dec p36**

A

Ancillary units available for pressworking **Oct p36**
Adopt automation—but with some consideration **May p40**
Advanced manufacturing technology: Just what is AMT and how can it be implemented? **Jun p10**
Advances in grinding technology **Apr p16**
Advancing the application of robotic welding **Jul/Aug p38**
Advantages of laser cutting sheetmetal **Oct p54**
Aiming to teach the basics of FMS **Nov p55**
All is quiet at Harveys! **Dec p19**
Annual Report **Jan p25**
Annual Accounts **Jan p32**
Assembly:
- Flexible assembly automation—the next frontier **Oct p20**
- Flexible assembly cell to be set up at Longbridge **Apr p30**

Austin Rover leads car makers towards 'total automation' **Oct p10**
Automated assembly ripe for investment **Mar p20**
Automated cell improves quality of kettles **Dec p9**
Automated deburring and radiusing **Feb p32**
Automated manufacturing development at Colman's **Dec p36**
Automated process planning—the route to CIM **Sept p44**
Automation—it still takes people **Jul/Aug p24**

B

Beaver moves upmarket with horizontal CNC machining centre **May p38**
Beechams cuts inventory costs **Dec p35**
Behind the iron curtain, but not behind the door! **Sept p8**
Benefits of CAPM are far too often under estimated **Sept p35**
Boots automates throat lozenge production **p17**
Boring:
- Innovations in Microbore range **Feb p17**
- Tooling costs cut with new facing and boring bar **Feb p20**

Budget and capital investment, The **May p56**

C

CAD/CAM:
- Automation—it still takes people **Jul/Aug p24**
- Capturing production engineering practice in a CAD/CAM system **Jun p80**
- How to make CAD/CAM pay **Nov p9**

Capital investment: The Budget and capital investment **May p56**
Camshaft testing by computer **Oct p17**
CAPM—little cause for optimism **Nov p12**
CAPM features:
- A new approach to BOM construction **Sept p49**
- Automated process planning—the route to CIM **Sept p44**
- Benefits of CAPM are far too often under estimated **Sept p35**
- CAPM clicks for major shoemaker **Sept p39**
- 'CAPM is the future of UK industry' **Sept p26**
- CAPM—values are changing! **Sept p48**
- Computer system helps Worcester cope with growth **Mar p32**
- Control package 'gives production engineer freedom' **Sept p29**
- Control WIP or forget any ideas of expansion **Sept p52**
- Controlling a new manufacturing plant **Mar p41**
- Developing your own capacity planning system **Mar p29**
- Fast, low-cost access to range of CAE programs **Mar p27**
- 'Flexible' system makes pet food production easy **Sept p23**
- How COPICS helped KTM grow in 'a harsh environment' **Sept p32**
- How does CAPM work? **Sept p17**
- How computerisation of work standards can improve industrial relations **Mar p23**
- How to make MRP really work **Mar p22**
- Maskoprint improves working conditions at Sandvik **Sept p33**
- Micross production control improves Carville efficiency **Sept p20**
- More haste, less speed when making system selection **Sept p17**
- Olivetti introduces software suite **Sept p52**
- 'Prime example' of closed loop MRP II **Mar p26**
- Production control system pays for itself in 18 months **Mar p38**
- Productivity boosted at Telecom **Sept p42**
- Resource planning tailor-made **Mar p39**
- Selecting a system—how a consultant goes about it **Sept p41**
- Stock problems 'solved' **Sept p42**
- What does a CAPM system consist of? **Sept p15**
- What is LOCAM? **Sept p47**
- Why Plessey picked PROTOS **Mar p41**

Capturing production engineering practice in a CAD/CAM system **Jun p80**
Carmakers are still the spearhead of manufacturing **Jun p68**
Caterpillar to install a second FMS **May p26**
Cell simulation **Apr p53**
CIM:
- Automated process planning—the route to CIM **Sept p44**
- Integrated manufacturing now a reality **Jun p78**
- IBM aims to become leader in CIM systems **Oct p23**
- Strategic benefits gained from CIM **Jun p14**

Cincinnati launches control system for FMS cells **Jan p42**
Citroën supplies cell **Nov p52**
CNC:
- Beaver moves upmarket with horizontal CNC machining centre **May p38**
- Colchester launches high volume turning centre in new strategy **May p35**
- EDM is the answer for toolmaking in modern materials **May p49**
- From handwheels to CNC in three years—next stop FMS? **May p13**
- Going for the most advanced tooling money can buy **Feb p14**
- Unmanned lathe brings Ulstein independence **May p15**
- Wallop! Two CNC lathes justified on large batches **Jul/Aug p21**

Colchester launches high volume turning centre in new strategy **May p35**
Companies must integrate—or stagnate! **Apr p9**
Complete guide to buying a computer, The **Nov p15**
Computer aids con-rod checks **Oct p15**
Consumables production feature **December issue:**
- All is quiet at Harveys! **p19**
- Automated manufacturing development at Colman's **p36**
- Beechams cuts inventory costs **p35**
- Boots automates throat lozenge production **p17**
- Detecting and rejecting foreign bodies **p30**
- Employees adapt well to new order picking system **p37**
- Filling bottles **p38**
- Getting tanked up on vodka and gin **p36**
- Modular oven design 'cuts installation time' **p38**

Monitoring beer gas in Eire **p36**
Monitoring system aids 'Crunchie' bar production **p26**
Production of prawns doubles **p27**
Rationalising coding methods at Wells Drinks **p33**
Sealing and stabilising **p34**
Second carton sealing system for Primula **p37**
Spray coating dragees **p18**
Strength of cigarettes cut by laser **p22**
Tetley makes teabags. . .**p26**
£50 000 order from BS **p36**
Control package 'gives production engineer freedom' **Sept p29**
Control, safety and diagnostics **Oct p57**
Control WIP or forget any ideas of expansion **Sept p52**
Controlling a new manufacturing plant **Mar p41**
Could the Kanban production control system work here **Jun p20**
Could vision sensors make jigs redundant? **Feb p40**
Cost-effective Strippit blanking **Oct p46**
Course in manufacturing to be launched by OU **Jan p23**
Cutting:
Advantages of lasercutting sheetmetal **Oct p54**
EDM is the answer for toolmaking in modern materials **May p49**
Sialon ceramics will cut nickel steels at speed **Feb p18**
Why metalworking fluids don't have to cause problems **Jul/Aug p35**

D

Design:
Two companies' views on machine tool design **May p67**
Designing the total system **Nov p53**
Despite £2¼ million fire, productivity is up for boiler maker **Oct p33**
Detecting and rejecting foreign bodies **Dec p30**
Developing your own capacity planning system **Mar p29**
Developments in drilling and contouring composites containing Kevlar **Sept p56**
DNC:
Traubs with DNC put flexibility into production **Jul/Aug p15**
Drilling:
High speed steel tools improve their performance **Feb p27**
Home grown driller 'ideal for FMS' **Mar p49**

E

EDM is the answer for toolmaking in modern materials **May p49**
Education:
Open University looks at potential of IT in education **Jan p23**
Course in manufacturing to be launched by OU **Jan p23**
Electronic vision now a reality **April p12**
Engineering Council: Honours only for CEng **Jan p18**
Estimating and costing—cheaper on a micro **Mar p34**
Experimental studies on ultrasonic machining **Dec p40**

F

Fast, low-cost access to range of CAE programs **Mar p27**
First for Saab with automatic handling system **Apr p15**
First Workmaster 'cleans up' at BAe **Jul/Aug p23**
Flexible assembly:
Flexible assembly automation—the next frontier **Oct p20**
Flexible assembly cell to be set up at Longbridge **Apr p30**
'Flexible' system makes pet food production easy **Sept p23**
FMS:
$10 million FMS at Vought to build fuselage components **Jan p39**
Austin Rover leads carmakers towards 'total automation' **Oct p10**
Behind the iron curtain, but not behind the door **Sept p8**
Caterpillar install a second FMS **May p26**
Cincinnati launches control system for FMS cells **Jan p42**
Flexible machining cell orders come rolling in for TI **Jan p50**
FMS for gas valve production **Apr p48**
From handwheels to CNC in three years—next stop FMS **May p13**
Home grown driller 'ideal for FMS' **Mar p49**
How Borg Warner tackles FMS **Mar p12**
Milacron's FMS—the first phase is installed **Jul/Aug p11**
Ships kept sailing by £2¼ million flexible machining system **Mar p17**
Westland adopts alternative to FMS **Mar p45**
FMS feature **November issue:**
Aiming to teach the basics of FMS **p53**
Citroën supplies cell **p52**
Designing the total system **p53**
Fear is the key **p36**
FMS needs management commitment **p18**
Glow-Worm extends cell with second Matrix machine **p34**
Mandelli FMS for Ferrari **p31**
Manufacturing system is 'revolutionary' **p45**
Micro Metalsmiths' Matchmaker machine **p46**
New approach to economic evaluation of FMS **p22**
Over 30 FMS projects 'in hand' in UK **p38**
Step-by-step FMS is best **p39**
Students look at organisation aspects of FMS **p48**
Swedes go for modular FMS **p33**
Towards unmanned production **p51**
UK 'second in FMS league' **p31**
Yasda cell for sub-contractor **p19**
Ford adopts OMR at Cork **Oct p11**
Freight Rover cut and stacked by Edwards Shear **Oct p49**

G

G&LF 'attacks' small machining centre market **May p30**
Get a grip on robot tooling **Apr p53**
Glow-Worm extends cell with second Matrix machine **Nov p34**
Going for the most advanced tooling money can buy **Feb p14**
Grinding: Advances in grinding technology **Apr p16**

H

Handling systems: First for Saab with automatic handling system **Apr p15**
Healthy outlook for plastics in manufacturing **Jul/Aug p28**
High speed steel tools improve their performance **Feb p27**
Home grown driller 'ideal for FMS' **Mar p49**
Honours only for CEng **Jan p18**
Hospital bed range welded by DAROS robot **April p38**
How Australian industry points way on Kanban **Jul/Aug p19**
How Borg Warner tackles FMS **Mar p12**
How computerisation of work standards can improve industrial relations **Mar p23**
How COPICS helped KTM grow in 'a harsh environment' **Sept p32**
How does CAPM work? **Sept p17**
How one company computerised its work measurement **Dec p13**
How the top people see Mach 84 **Jun p36**
How to make CAD/CAM pay **Nov p9**
How to make MRP really work **Mar p22**
Howden reaps benefit from flexible manufacturing cell **Nov p56**

I

IBM aims to become leader in CIM systems **Oct p23**
Innovations in Microbore range **Feb p17**
In the kingdom of the blind **Apr p45**
Integration:
Companies must integrate—or stagnate! **Apr p9**
Integrated manufacturing now a reality **Jun p78**

J

Jigs: Could vision sensors make jigs redundant? **Feb p40**
Just what is AMT and how can it be implemented? **Jun p10**

K

Kanban:
Could the Kanban production control system work here? **Jun p20**
How Australian industry points the way on Kanban **Jul/Aug p19**
Kenneth Baker is replaced by a robot **Apr p31**

L

Lathes:
SMT lathe now has ATC **Jun p13**
Unmanned lathe brings Ulstein independence **May p15**
Wallop! Two CNC lathes justified on large batches **Jul/Aug p21**
Learning about today's feeds and speeds—it's a revelation! **Jan p14**
Linked multi-spindle autos in £1 million turbocharger cell **May p22**

M

Mach 84:
Preview issue **May**
Show issue **Jun**
Machine tool design 'outdated' for unmanned operations **Jun p28**
Machining centres:
Beaver moves upmarket with horizontal CNC machining centre **May p38**
G&LF 'attacks' small machining centre market **May p30**
New machining centre built for unmanned operation **Oct p30**
Major Scottish Engineering show set for November **Oct p62**
Mandelli FMS for Ferrari **Nov p31**
Manufacturing system is 'revolutionary' **Nov p45**
Maskoprint improves working conditions at Sandvik **Sept p33**
Metal forming firms must invest in new technology **Sept p11**

Micro Metalsmiths' Matchmaker machine **Nov p46**
Micross production control improves Carville efficiency **Sept p20**
Milacron's FMS—the first phase is installed **Jul/Aug p11**
Modular oven design 'cuts installation time' **Dec p38**
Monitoring: Simple vision system monitors tools and swarf **Feb p24**
Monitoring system aids 'Crunchie' bar production **Dec p26**
More haste, less speed, when making system selection **Sept p17**

N

New approach to economic evaluation of FMS **Nov p22**
New-found optimism at Subcon '84 **May p75**
New machining centre is built for unmanned operation **Oct p30**
New press outstrips ancillaries at MK **Oct p38**

O

Open University looks at potential of IT in education **Jan p23**
Over 30 FMS projects 'in hand' in UK **Nov p38**

P

Palletiser pays for itself 'in two years' **Dec p27**
Perkins' £6m machining cell starts turning **Feb p10**
Plastics: Healthy outlook for plastics in manufacturing **Jul/Aug p28**
'Prime example' of closed loop MRP II **Mar p26**
Production control:
- Could the Kanban production control system work here? **Jun p20**
- How Australian industry points way on Kanban **Jul/Aug p19**
- Production control system pays for itself in 18 months **Mar p38**

Pullmax aids productivity and quality **Oct p43**

Q

Quality assurance of spot welds in aluminium **Nov p58**
Quality circles benefit foundries **Mar p15**

R

Rationalising coding methods at Wells Drinks **Dec p33**
Research and Development:
- Advancing the application of robot welding **Jul/Aug p38**
- Capturing production engineering practice in a CAD/CAM system **Jun p80**
- Developments in drilling and contouring composites containing Kevlar **Sept p56**
- Experimental studies on ultrasonic machining **Dec p40**
- Quality assurance of spot welds in aluminium **Nov p58**
- Sheetmetal forming for small batches using sacrificial tooling **Oct p58**

Resource planning tailor-made **Mar p39**
Robotics:
- Advancing the application of robotic welding **Jul/Aug p38**
- First Workmaster 'cleans up' at BAe **Jul/Aug p23**
- Robot system gives rubber plant flexibility **Jun p76**
- Robotic welding speeds up **Mar p46**
- Robotics—the scope for growth **Oct p26**
- Training robot prepares students for the way ahead **Jan p16**

Robotics feature **April issue:**
- Cell simulation **p53**
- ESAB expands **p42**
- Flexible assembly cell to be set up at Longbridge **p30**
- FMS for gas valve production **p48**
- Get a grip on robot tooling **p53**
- Hospital bed range welded by DAROS robot **p38**
- In the kingdom of the blind **p45**
- Kenneth Baker is replaced by a robot **p31**
- Robot loading on a notching press at NEI **p41**
- Robot safety **p42**
- Robot take-over at Ford **p27**
- Robots at Open Tech **p46**
- Robots 'can improve attitudes' **p51**
- Robots retrofitted in West Country **p49**
- Social implications of robots **p37**
- Weld robot customers come back for more **p24**
- What's new in the world of robotics **p34**

S

Scottish Engineering show: preview **Oct p62**
Sealing and stabilising **Dec p34**
Second carton sealing system for Primula **Dec p37**
Selecting a system—how a consultant goes about it **Sept p41**
Shape gamble pays off for Protech **Oct p35**
Sheetmetal forming for small batches using sacrificial tooling **Oct p58**
Sheetmetal working feature **October issue**
- Advantages of laser cutting sheet metal **p54**
- Ancillary units available for press working **p36**
- CAD eliminates need for trial and error **p46**
- Control, safety and diagnostics **p57**
- Cost-effective Strippit blanking **p46**
- Despite £2¼m fire, productivity is up for boiler maker **p33**
- Fast tool-change and set-up on Trumpf **p47**
- Freight Rover cut and stacked by Edwards Shear **p49**
- 'Invaluable' conference on pressworking **p47**
- New press outstrips ancillaries at MK **p38**
- Pullmax aids productivity and quality **p43**
- Sales up 50% with Strippit **p55**
- Shape gamble pays off for Protech **p35**
- Trumpf system doubles sheet size capacity **p51**
- Two-fold time reduction with lasers **p54**

Ships kept sailing by £¼m flexible machining system **Mar p17**
Sialon ceramics will cut nickel steels at speed **Feb p18**
Simple vision system monitors tools and swarf **Feb p24**
SMT lathe now has ATC **Jun p13**
Social implications of robots **Apr p37**
Spray coating dragees **Dec p18**
Standard data or own values **Mar p34**
Step-by-step FMS is best **Nov p39**
Strategic benefits gained from CIM **Jun p14**
Strength of cigarettes cut by laser **Dec p22**
Students look at organisational aspects of FMS **Nov p38**
Subcon 84: preview **May p75**
Surface Treatment and Finishing Show: preview **May p77**
Swedes go for modular FMS approach **Nov p33**

T

Tarex Berger makes unmanned machining theme of exhibition **Feb p35**
Technology—the key to company survival **Jan p38**
Tetley makes teabags. . .**Dec p26**
Tooling costs cut with new facing and boring bar **Feb p20**
Toolmaking: EDM is the answer for toolmaking in modern materials **May p49**
Towards unmanned production **Nov p51**
Training robot prepares students for the way ahead **Jan p16**
Traubs with DNC put flexibility into production **Jul/Aug p15**
Trumpf system doubles sheet size capacity **Oct p51**
Turbochargers: Linked multi-spindle autos in £1 million turbocharger cell **May p22**
Two companies' views on machine tool design **May p67**

U

Unmanned machining:
- Machine tool design 'automated' for unmanned operation **Jun p28**
- New machining centre is built for unmanned operation **Oct p30**
- Robot system gives rubber plant flexibility **Jun p76**
- Simple vision system monitors tools and swarf **Feb p24**
- Tarex Berger makes unmanned machining theme of exhibition **Feb p35**
- Towards unmanned production **Nov p51**
- Unmanned lathe brings Ulstein independence **May p15**
- Unmanned turning cells put Volvo in driving seat **Jun p13**

UK 'second in FMS league' **Nov p31**

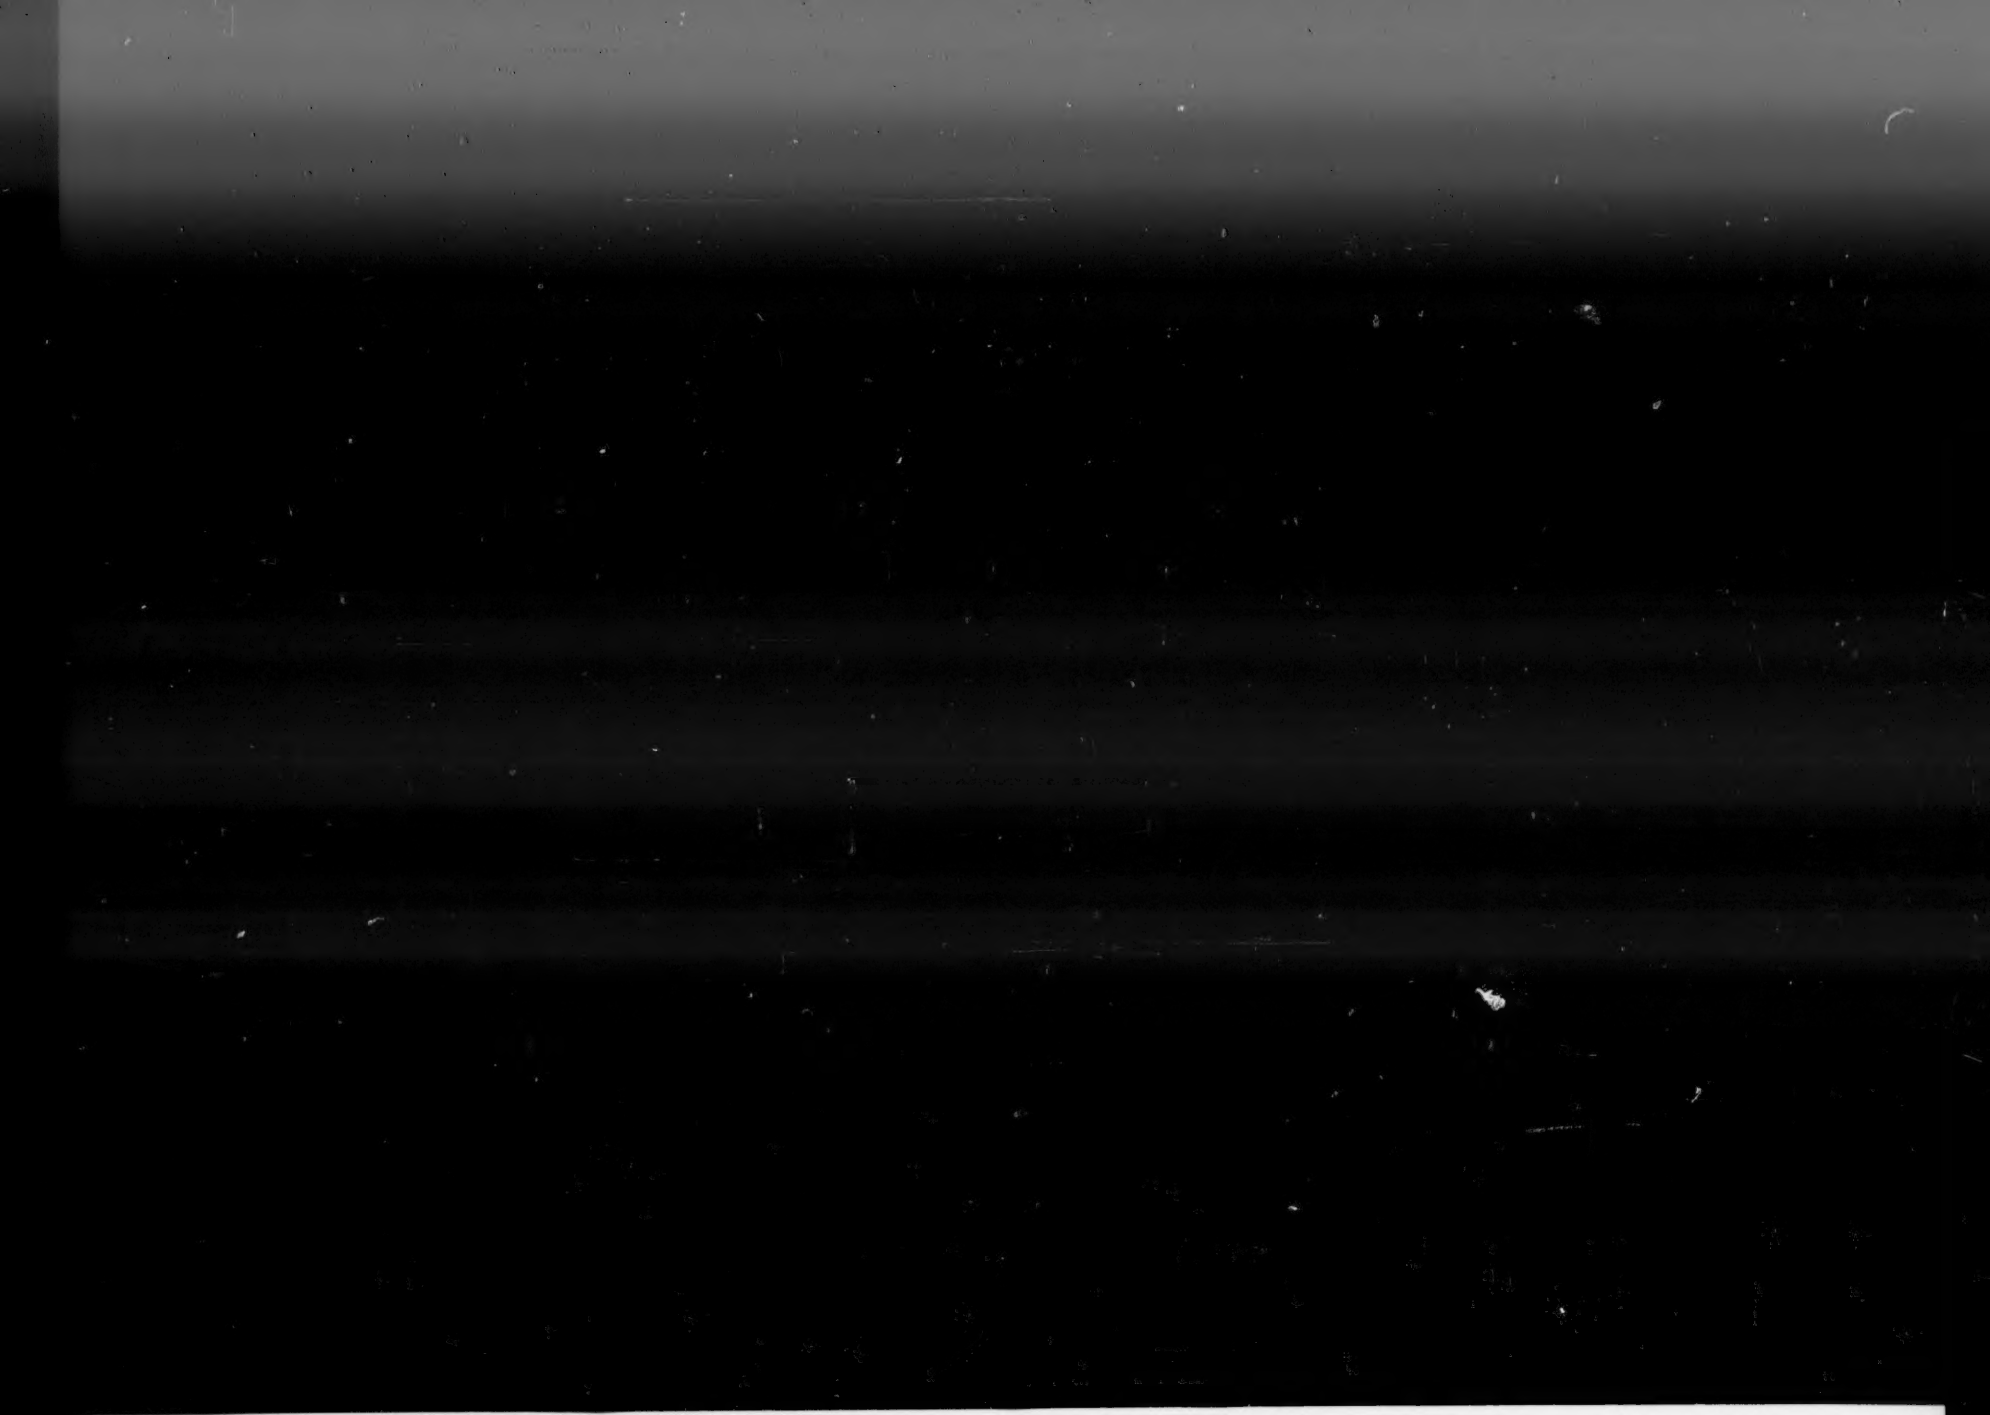
V

Valves: FMS for gas valve production **Apr p48**
Vision systems:
- Could vision sensors make jigs redundant? **Feb p40**
- Electronic vision now a reality **Apr p12**
- Simple vision system monitors tools and swarf **Feb p24**

W

Wallop! Two CNC lathes justified on large batches **Jul/Aug p21**
Welding:
- Weld robot customers come back for more **Apr p24**
- Quality assurance of spot welds in aluminium **Nov p58**

Westland adopts alternative to FMS **Mar p45**
What does a CAPM system consist of? **Sept p15**
What's new in the world of robotics **Apr p34**
Why metalworking fluids don't have to cause problems **Jul/Aug p35**
Why Plessey picked PROTOS **Mar p41**
Workmaster will extend the Hazmac robot range **Jun p24**

Y


Yasda cell for sub-contractor **Nov p19**
